Action Information		
Description: (email 9/18/09) [REDACTED], Environmental and Regulatory Manager for Pioneer Natural Resources sent letter describing the spill and follow up actions by Pioneer. Several photo's were included including plan view depicting the flow lines of the spill. Also included were photo's showing deployment of hard and soft booms. Based on my discussion with Mr. Holland and his report, it appears the PRP is conducting an adequate job of managing the release, which they estimate to be 160 barrels of produced water and 4 barrels of oil. Belfor Environmental was called in to assist with the cleanup on 9/17/09. The spill was reported to the Colorado Oil and Gas Conservation Commission and the Colorado Department of Public Health and Environment by Pioneer on the morning of 9/17/09.
